

Motivated and socially conscious young people:

- Passionate young people with some demonstrable experience of social action.
- Creative and/or entrepreneurial.
- Want to make a difference in the world but need improved networks, skills and focus to achieve their potential impact.

Further young people engaged at journey stop locations

Participants to come from each of the journey stop locations to act as local hosts

Theory of Change

On a learning journey to explore how enterprise and creativity can drive change in communities...

Build inspiring networks

We bring together diverse and committed networks of 'change drivers' who encourage each other to fulfil their potential.

www.driversforchange.org.uk

Exposure to best practice

Through project visits the change drivers develop an understanding of innovative approaches to tackling complex social issues.

Enterprise skills

Practical workshops and follow up mentoring provide knowledge and skills, equipping the change drivers to start or contribute to a creative or social enterprise.

Leadership skills and personal development

The experiential learning experience and intense journey environment are designed to develop self-awareness, conflict-resolution, empathy and confidence.

Ultimate impact:

Young people play an increased role in improving their communities and use creative and entrepreneurial approaches to bring about change.

Some of the change drivers will start new projects/enterprises creating a network of youth led social action projects/enterprises

Some of the change drivers will have impactful careers, going on to become innovators in their workplaces.

Some of the change drivers will start campaigns to drive change on issues they care about.
